ABOUT ME

Motivated and results-driven Information Systems student at Universiti Teknologi MARA (UiTM) with a CGPA of 3.88 and consistent Dean's List recognition. Skilled in system analysis, database design, UI/UX principles, and full-stack web development through academic and hands-on projects. Proficient in technologies including HTML, CSS, PHP, Laravel, SQL/MySQL, Bootstrap, and Power BI, with experience in data visualization, CRUD operations, and database normalization. Recognized for strong leadership and organizational abilities in managing student activities with confidence and responsibility. Passionate about developing practical and user-friendly digital solutions while continuously enhancing technical and problem-solving skills. Available for internship placement from **1 September 2026 until 12 February 2027**.

KEY COMPETENCIES

Languages

- Melayu (Fluent)
- English (Intermediate)
- Arab (Intermediate)

Professional Skills

- System Analysis & Documentation
- UI/UX Design Principles
- Data Visualization
- Database Design & Normalisation
- Record Management (CRUD)
- Data Validation
- Search & Sort Algorithms
- File Input & Output
- Front-End & Back-End Development

Technical Skills

- C++
- JavaScript (Beginner)
- HTML, CSS
- SQL & MySQL Queries
- PHP
- Laravel
- XML & XSL (Basic)
- Bootstrap
- Basic Web Development
- Entity Relationship Diagram (ERD)
- Apache
- Cloudflare (CDN & DNS Management)

Software & Tools

- Microsoft Word, Excel, PowerPoint
- Power BI
- Figma
- phpMyAdmin
- Google Developer Tools
- XAMPP
- Laragon
- Visual Studio Code (VSC)
- Sublime Text
- Dev-C++
- DevOps
- Antigravity

PROFESSIONAL EXPERIENCE

Ferrari Malaysia | Glenmarie.

2025

Finance Administration Part-Timer

- Performed data entry accurately into the Keyloop system for financial records and transactions.
- Assisted in managing daily finance administrative tasks including invoicing, filing, and documentation.
- Handled and monitored company bank transactions such as payments, transfers, and reconciliation.
- Ensured timely updates of financial records in compliance with internal procedures.
- Supported the finance team in preparing reports and maintaining transaction logs.

Ferrari Malaysia | Glenmarie.

2024

Human Resources Information Systems (HRIS) and Administration Intern

- Worked as an intern from July to September 2024.
- Developed recruitment skills through candidate sourcing, resume screening, interview coordination, and onboarding support.
- Gained experience using the Timesoft HR system to manage employee data and reports.
- Assisted in employee engagement activities to improve workplace culture and teamwork.
- Enhanced communication, collaboration, and knowledge of labor laws and HRIS best practices.

IPrint4u | Shah Alam.

2022 & 2024

Data Entry Part-Timer

- Worked as a part-timer for one month from August to September 2022 and another month in February 2024.
- Sorted and organized documents to ensure efficient record management.
- Proactively verified data against source documents to maintain accuracy and consistency.
- Carried out various tasks assigned by my superior, demonstrating flexibility and a proactive approach to organizational needs.

Ferrari Malaysia | Glenmarie.

2023

Record and Data Entry Part-Timer

- Worked for one month during the semester break from August to September 2023.
- Scanned and organized over 300 car-related documents by customer and car model.
- Supported the company's green initiative by assisting in the transition to a paperless system.
- Improved document management and accessibility through OneDrive file uploads and sharing.
- Enhanced organizational and technological skills while supporting sustainability goals.

ACADEMIC PROJECT

E-Leave and Travel Warrant System for Ferrari Malaysia

Final Year Project (FYP) | HR Management System

Technologies & Tools: PHP, HTML, CSS, Java, C++, MySQL, Figma, XAMPP, phpMyAdmin, Visual Studio Code, User Testing

- Developed a web-based HR management system for employee leave applications and travel warrant requests.
- Managed the project lifecycle from project planning, requirement gathering, system analysis, development, testing, and prototyping.
- Conducted interviews and requirement analysis to understand the company workflow and user needs.
- Designed admin dashboards for leave approval, employee management, and application tracking.
- Automated leave and travel application workflows to improve efficiency and reduce manual paperwork.
- Developed responsive user interfaces using PHP, HTML, and CSS.
- Designed and managed MySQL databases for employee records, leave data, and approval processes.
- Created system prototypes and UI designs using Figma.
- Performed user testing and system evaluation to improve usability and functionality.
- Collaborated on documentation, workflow diagrams, and system reports for the final project presentation.

GoFit System

Gamification Gym Management System | System Development

Technologies & Tools: PHP, HTML, CSS, Java, C++, MySQL, XAMPP, phpMyAdmin, Visual Studio Code, Figma

- Developed a gamification-based gym management system for GoFit fitness center.
- Designed customer and admin modules to manage memberships, rewards, and gym activities.
- Implemented leaderboard and point collection features to increase customer engagement and motivation.
- Built an online reward and shop module where users can redeem points for prizes.
- Assisted in system analysis, feature planning, and workflow design.
- Developed user-friendly interfaces and integrated backend functionalities.
- Managed database structures for customer profiles, rewards, transactions, and leaderboard tracking.
- Participated in testing, debugging, and system improvement processes.
- Improved understanding of gamification concepts and customer engagement systems.

TK By Tyra Inventory System

Inventory Management System | System Development

Technologies & Tools: PHP, HTML, CSS, Java, C++, MySQL, XAMPP, phpMyAdmin, Visual Studio Code

- Built an inventory management system for TK By Tyra, a Malaysia-based makeup company.
- Developed features for stock in/out management and product inventory tracking.
- Designed admin dashboards for monitoring inventory updates and product availability.
- Managed supplier information and inventory records using MySQL databases.
- Created modules for adding, editing, and updating product information efficiently.
- Assisted in database design and system workflow planning.
- Improved inventory monitoring processes to reduce manual record management.
- Participated in system testing and troubleshooting to ensure system reliability.
- Enhanced understanding of inventory operations and database management systems.

Taylor University Walk

UI/UX Design Prototype | Smart Campus Navigation System

Technologies & Tools: Figma, Canva, User Testing, Wireframing, Prototyping Tools

- Designed a smart campus navigation prototype focused on improving user experience for students, staff, and visitors.
- Created interactive UI/UX prototypes using Figma.
- Developed features such as AR navigation, saved locations, and campus route guidance.
- Included OKU-friendly accessibility features to support inclusive campus navigation.
- Designed user-friendly interfaces with a focus on simplicity and accessibility.
- Conducted user testing sessions to collect feedback and improve prototype usability.
- Applied UI/UX principles such as wireframing, prototyping, user flow, and interface consistency.
- Collaborated on design discussions and feature improvement planning.

GoFit System Proposal Project

Project Management & System Analysis

Technologies & Tools: Requirement Analysis, Workflow Planning, Documentation, Canva, Draw.io, Lucidchart, Figma

- Developed a complete project proposal for a gym management system solution for GoFit.
- Conducted business process analysis and identified operational challenges faced by the gym company.
- Performed requirement gathering and workflow analysis to design suitable system solutions.
- Prepared project planning documentation, including objectives, scope, and functional requirements.
- Designed workflow diagrams, process flows, and proposed system structures.
- Focused on improving operational efficiency and customer engagement through digital solutions.
- Strengthened knowledge in project management methodologies and system analysis techniques.

Travel Data Analytics

Data Analytics & Visualization Project

Technologies & Tools: Power BI, Microsoft Excel, CSV Dataset Processing, Data Cleaning Techniques

- Analyzed travel-related datasets using Power BI to generate business insights and visual reports.
- Performed data cleaning to improve data quality and remove inconsistencies.
- Applied data transformation and data reduction techniques for better analysis accuracy.
- Designed interactive dashboards and visualizations to present findings clearly.
- Generated analytical insights related to travel trends, customer behavior, and performance metrics.
- Improved skills in data visualization, reporting, and analytical thinking.
- Collaborated in a group project environment to analyze and present data-driven solutions.

Restaurant Reservation System

Database Management System Project

Technologies & Tools: MySQL, phpMyAdmin, XAMPP, SQL Queries, Visual Studio Code

- Developed a restaurant reservation system using MySQL database management.
- Designed database tables and relationships for customers, reservations, and restaurant management.
- Created SQL queries for reservation handling, booking records, and customer information management.
- Analyzed database performance and optimized query structures for efficient data retrieval.
- Applied CRUD operations for managing reservation data effectively.
- Improved understanding of relational database concepts and SQL operations.
- Strengthened skills in database design, normalization, and system analysis.

EDUCATION & CERTIFICATIONS

Bachelor of Information Science (Hons.) Information Systems Managements

UiTM Campus Machang, Kelantan | 2025 - 2027

CGPA 3.88

Diploma in Information Science Management

UiTM Campus Rembau, Negeri Sembilan | 2022 - 2025

CGPA 3.63

Certified Cybersecurity Foundation

Cybersecurity Foundation Professional Certification | 2026 | In Progress

AI for Career Readiness Professional Certification | 2026 | In Progress

NotebookLM Licence | 2026

EXTRACURRICULAR ACTIVITIES

2026 - Joined a class for a professional certificate organised by UiTM and sponsored by Yayasan Peneraju

2025 - Recognised as President of a club called PTAR Buddies (Library Club) at UiTM.

2024 - Recognised as President of a club called PTAR Buddies (Library Club) at UiTM.

2023 - Recognised as Treasurer of PTAR Buddies Club in UiTM.

2022 - Recognised as Exco of Protocol of PTAR Buddies Club in UiTM.

AWARDS AND ACHIEVEMENTS

Dean List Awards

UiTM Campus Machang

Semester 3 & 4

UiTM Campus Rembau

Semester 1, 3, 4 & 5

Academic Achievement

- Parliament UiTM Negeri Sembilan Campus as President of PTAR Buddies Club
- Final Year Project (IMD317): "Inkspire Future" as Exco of Protocol
